ACTIVITY-5 :MVP PRESENTATION

CONNECTING HUMANITY

FUTURE FUNCTIONALITY

- Notification and Subscription
- Multilingual application
- Online Payment Gateway

Summary of how you felt about this project.

- First of all, I could not believe that I have completed dynamic web application in less than one month period. My confidence level is boosted that now I think everything is possible if you have enough determination.

- I have make many mistakes in coding and I learnt how to tackle circumstance. I have add many new features in this project and learnt many new things.

- I have used Django framework for this project and it's a perfect framework for rapid development of secure and maintained websites as per the definition and I can assure you by this experience.

WHAT WENT WELL DURING PROJECT

- During this project I have completed all the back-end functionality and database connectivity in just a week. So, my back-end development went very well.

- Time management

WHAT NOT WELL

- Used Django first time
- Getting familiar with Django MVT Framework
- Designing user interface
- Making Commercial

SOFTWARE DESIGN ACTIVITY AND FINDINGS

- Requirement gathering in Activity-1
- Followed methodology throughout
- Lectures were very helpful for Design Activity and finding

THINGS I DO SAME ON FUTURE PROJECT

- Technological Framework
- Same Work Flow
- Documentation
